

1. Olympic Board Timer is Slower than the actual time. Please check and fix it.
2. This Message Number should be on the message icon, Now We can't see any mark in the message when we received the coins reward. Please check the design and the red number on the avatar is to show if the user has never updated his profile before. Please set them as the deisgn.

3. There should be a coin icon beside the reward message...now it's showing just a blank white icon

4. Spelling Mistake at the Failed screen - Network Error

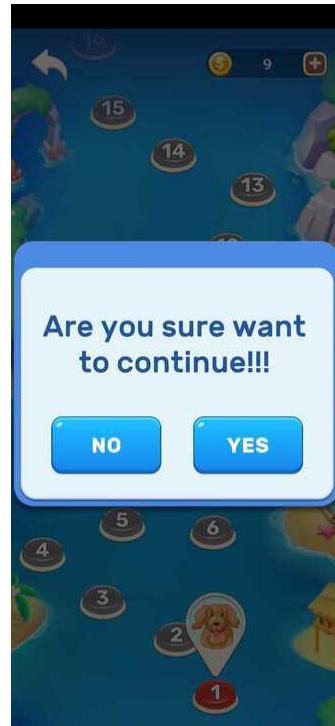

5. For Levels - If we return to a previous stage using undo button then our target box also should return to the last stage. Check this video from this [link](#)

6. Re-Order Button should be Replaced By Swap Button for Olympics and Endless

7. Upload Score Button Should be added to Olympic and Endless Mode

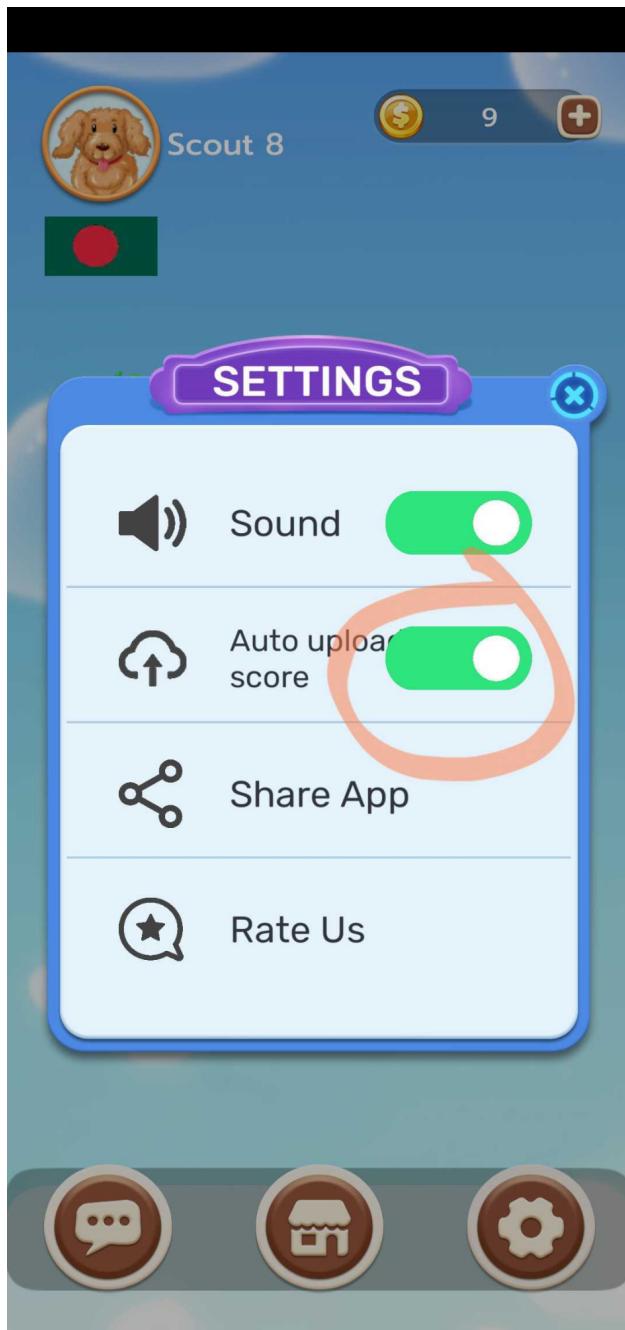

8. Need to update the Level start popup.....there must be a PSD file from the designer....please check. So instead of this below image please use that...

9. When users claim coins from the Inbox Reward popup, the coin balance should fly to the coin box with an animation.

10. Endless Score Upload not working at Game over - Now for endless the score is uploading after the specific time (Maybe every minute) But it also should Upload the score to the Ranking board if the user got a game over.

11. Settings UI Problem - The upload score button is hiding text

12. We allow only 1 Revive per Game for Endless.....But now we can revive unlimited. Please fix this

13. After Million, There should be Giga or G....but in the Highscore of the Game Board, it's still B.  
The ranking is Good, It's already showing in G instead of B.

1000	k	kilo	1024	Ki	kibi	K	kilo
$1000^2$	M	mega	$1024^2$	Mi	mebi	M	mega
$1000^3$	G	giga	$1024^3$	Gi	gibi	G	giga
$1000^4$	T	tera	$1024^4$	Ti	tebi	T	tera
$1000^5$	P	peta	$1024^5$	Pi	pebi	-	
$1000^6$	E	exa	$1024^6$	Ei	exbi	-	

14. 1B & 2B color is sometimes the same and I found 2 colors for 2B and that is not connectable with 1B (as it is the same with 1B color) or 2B. Please Watch this video for better understanding.  
[Video Link](#).....(This 2B Entered as Rand Number)...

15. This bug happens in a series:

1. In Endless mode, click pause to show the pause menu
2. Click restart, nothing happens
3. Click the close icon, the board got cleared and all buttons in the pause menu become non-effective
4. When I close the app and re-enter Endless game board, my score got cleared

16. First-time app open country star is always set as china. As we discussed today. Please investigate the problem.

17. When we click quit from the pause menu of Olympics and Endless, we should not go back to Home Page. We should back to the ranking board for Olympics and Endless.

18. Please update block colors for the light theme. (Please check the below discussion Screenshot)

Screen Shot 2022-06-03 at 7.48.50 PM.png ▾

one thing I need to discuss with you

after you add our old background as extra theme

we will have 3 light theme and 2 dark theme, correct?

for light theme, can we use these 12 colors

6 from our old app and 6 from UI design (light theme)

so 12 block colors

for dark theme, keep it unchanged, I will decide after light theme is confirmed

19. For score display, no need to do: score/high score, just display score only and should display in the same format as the Ranking board. Example - 1.23K, 2.30M (**2 decimals after the decimal point**)

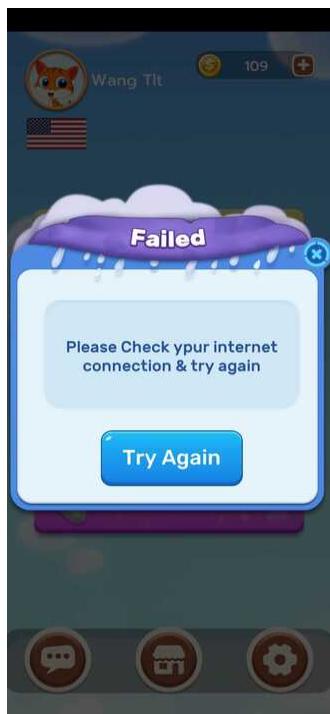

20. We cannot change the country now But we need to allow change for once. only once of course, also need to display this popup when the user selected to confirm.

21. We need to display the correct coins needed for each of the three operations. Hammer and Swap = 30 each. Revert = 2.

22. No Block Same as Target Number should Drop - So If our Target block is 512 then 512 Should not enter the board as Rand Number

23. When I open the ranking board but failed to fetch the list. it shows an error popup on top of the home page But it should show this error popup on top of the ranking board.

24. After a Game was Over I Started a new game and the total score is only 36 but 67M dropped as Rand Number. Please Check.
